

SILENT CONFERENCE

Game changing audio solutions

Silent Conference is the leading provider of headphone based conference and seminar solutions.

Trusted by the world's most successful brands and production companies, Silent Conference revolutionizes events:

- Maximum content at conferences
- Optimum delegate engagement
- Multiple languages in one place

From large corporate summits to conferences, trade shows and small training sessions – Silent Conference systems offer endless possibilities.

5,000,000

Hours of engaging audio have been delivered by brands such as Sky, LinkedIn and Unilever through our headphones.

20,000+

Premium wireless headphones with full bespoke customization to help bring your creative vision to life.

Wherever you want

Silent Conference enables you to select event spaces in a way never previously possible. You are no longer confined to traditional exhibition halls and breakout spaces; now you can host events anywhere without having to worry about the audio acoustics.

Forget noise restrictions

Hold events in spaces with noise restrictions or locations where a PA system cannot be deployed.

Share the space

Bring your delegates together without segregating attendees by sending them to breakout rooms.

Maximize engagement

Numerous studies have quantified the impact of background noise on people's concentration, and ability to absorb audio and visual information.

Results indicate that where participants experience the distraction of background noise, between 10 to 60% of information is lost or forgotten.

Keep focused

Sound spill can prove difficult at conferences, but when your audience puts on a set of our headphones they are immersed directly in the content, with no distractions.

Roam free

With a range of up to 300 meters, your delegates are free to move around the conference space while still engaging with your content.

Branding the headphone caps with your client's logo gives them more exposure to the delegates and in post event images and media.

A choice of LED colors can help you raise awareness, stay on brand and easily identify your audio zones.

The art of color

Choose from seven colors of LED lights

Make an impact

Customized headphones often create a storm on social media from the delegates attending your event - they love them!

Come on then @Xero, why aren't these headphones available in store yet?!

@Kieranmay94

Day 2! Today it's all about the breakout sessions with headphones #alwayslearning

@esthera4c

Listening to this talk on headphones as is everyone else - this is really neat! No worries about the folks at the back. Great way to divide a big space into two spaces. #MBDE18
